Development: Node.js, Express, EJS, Python, Playwright, REST APIs, JavaScript, Bootstrap

Content & Strategy: Content writing and editing, social media strategy, audience growth, quality assurance

Accessibility & SEO: WCAG 2.1 AA, image alt text, colour contrast, structured headings, Google Analytics, SEO

Tools: Adobe Creative Suite, Canva, AI-assisted content tools, Microsoft Office Suite

PROFESSIONAL EXPERIENCE

Digital Content Creator

2023 – Present

Self-Employed

- Built and managed an independent fashion and lifestyle content platform, growing to 5,000+ followers and 500K+ total views through consistent publishing and strong visual storytelling.
- Applied SEO practices including keyword research and optimisation of page titles and headings to improve search visibility.
- Ensured all published content followed WCAG accessibility principles — including image alt text, colour contrast, and structured headings.
- Analysed Google Analytics engagement data to identify high-performing content and inform publishing strategy.

Web Developer – Project Support

2021 – 2023

K2L, Canberra

- Assisted with website and digital platform updates, ensuring content accuracy, usability, and consistent formatting.
- Applied HTML and CSS to implement content changes and maintain web page presentation standards.
- Used SharePoint to organise and maintain documentation and information resources for internal teams.
- Developed user guides and procedural documentation to support staff capability across digital systems.

Project Support Officer

2021

ACS Program

- Coordinated project documentation and maintained records aligned with reporting requirements.
- Prepared user manuals and training documentation to support system adoption.

Graduate Project Support

2018

Macquarie University & Suncorp

- Contributed to a university–industry web application project for Suncorp, supporting usability testing, documentation, and stakeholder communication.
- Assisted with reporting and testing activities to support digital system improvements.

SELECTED PROJECTS

Job Search Automation Dashboard

2026

Personal Project

- Built a Python + Playwright tool that automatically scans SEEK and Indeed every hour, filters listings, and stores results as JSON.
- Developed a live local dashboard displaying tracked jobs with status filtering and one-click apply.

BeSafe — Blog & Community Web App

2021

ACS Program

- Built a full-stack web application using Node.js, Express, and EJS with user authentication (login/register) and a dynamic blog with pagination.
- Designed a fully responsive multi-page layout for both desktop and mobile.

Suncorp Travel Insurance Web App

2018

Macquarie University & Suncorp

- Built a multi-step travel insurance quote and purchase flow with conditional logic, form validation, and a dynamic quote generator.
- Implemented using HTML, CSS, JavaScript, AngularJS, and Bootstrap.

EDUCATION

Master of Engineering Management

2019 – 2020

University of Technology Sydney

Risk Management · Project Management · Operations Management · Financial Management

Bachelor of Information Technology

2016 – 2019

Macquarie University

Web Development · Database Systems · Software Engineering · Data Structures

ADDITIONAL INFORMATION

- Committed to inclusive communication practices and web content accessibility standards.
- Open to opportunities across Australia — Canberra, Sydney, and remote-friendly roles.
