PROFESSIONAL SUMMARY

Web designer and digital professional with experience across website design, WordPress, WooCommerce, SEO, accessibility, and front-end development. Experienced in creating branded websites, ecommerce concepts, and content-driven digital experiences for small businesses and online audiences. Combines strong visual judgement with hands-on technical execution to deliver clear, responsive, and user-focused web solutions.

KEY SKILLS

Web Design & CMS: Web design, WordPress, WooCommerce, web content publishing, HTML/CSS, SharePoint, digital asset management

Development: React, Vite, Node.js, Express, Python, FastAPI, JavaScript, REST APIs, Playwright, Bootstrap, Canvas API, Web Audio API

SEO & Accessibility: SEO, website audits, Google Analytics, WCAG 2.1 AA, semantic HTML, image alt text

Content & Strategy: Content writing and editing, content structure, audience growth, quality assurance, social media strategy

Tools: Adobe Creative Suite, Canva, AI-assisted development tools (e.g. Claude, Codex), Microsoft Office Suite

Product & Performance: Product delivery, feature design, performance analysis, data-driven optimisation, product performance tracking

PROFESSIONAL EXPERIENCE

Web Designer

2026 – Present

2600 Design

- Designed and developed custom websites and ecommerce concepts for small businesses, including brand websites, Shopify storefronts, and WordPress/WooCommerce projects.
- Delivered responsive layouts, content structure, and front-end design across multiple portfolio projects in hospitality, retail, and beauty.
- Built project presentation pages and maintained the 2600 Design website to support studio positioning and client-facing work.

Digital Content Creator

2023 – Present

Self-Employed

- Built and managed an independent fashion and lifestyle content platform, growing to 5,000+ followers and 500K+ total views through consistent publishing and strong visual storytelling.
- Applied SEO practices including keyword research and optimisation of page titles and headings to improve search visibility.
- Ensured all published content followed WCAG accessibility principles — including image alt text, colour contrast, and structured headings.
- Analysed Google Analytics engagement data to identify high-performing content and inform publishing strategy.

Web Developer – Project Support

2021 – 2023

K2L, Canberra

- Assisted with website and digital platform updates, ensuring content accuracy, usability, and consistent formatting.
- Applied HTML and CSS to implement content changes and maintain web page presentation standards.
- Used SharePoint to organise and maintain documentation and information resources for internal teams.
- Developed user guides and procedural documentation to support staff capability across digital systems.

Project Coordinator

2021

ACS Program

- Supported end-to-end delivery of web application projects, including requirements analysis and documentation

- Coordinated project artefacts aligned with delivery timelines
- Collaborated with cross-functional team members to support project progress, track tasks, and resolve issues

Graduate Project Support

2018

Macquarie University & Suncorp

- Contributed to a university–industry web application project for Suncorp, supporting usability testing, documentation, and stakeholder communication.
- Assisted with reporting and testing activities to support digital system improvements.

SELECTED PROJECTS

Cloudy Clothing – WordPress & WooCommerce Fashion Store

2026

Personal Project [View Project](#)

- Designed and developed a custom WordPress and WooCommerce fashion ecommerce project with a soft, minimal shopping experience.
- Built a branded child theme and designed the product, cart, and checkout flow with a focus on clean presentation and responsive browsing.

Stockwise- Stock Analysis Web App

2026

Personal Project [Live Demo](#) | [GitHub](#)

- Built a full-stack stock analysis platform covering US and ASX equities, with watchlists, ETF screening, price charts, and market news
- Designed and shipped end-to-end product features to improve market data accessibility and support faster stock research across desktop and mobile
- Developed the application with React + Vite on the frontend and Python FastAPI on the backend, integrating Yahoo Finance data and deploying on Vercel and Render

SEO & Website Performance Audit

2026

Personal Project [View report](#)

- Conducted a structured SEO and website performance audit for a newly opened Canberra restaurant, covering technical integrity, content depth, local SEO, and Core Web Vitals.
- Delivered a prioritised audit report with actionable recommendations to improve visibility and performance.

Rainy Hour — Ambient Soundscape Web App

2026

Personal Project

- Built an immersive ambient soundscape app using vanilla HTML/CSS/JS with no frameworks — featuring real-time Canvas rain animation with ripple effects, Web Audio API sound synthesis, and multi-track audio layering with real field recordings from Australia.
- Implemented responsive dual-layout design (mobile drawer + desktop bar), CSS animations for fog and lightning effects. Deployed live on GitHub Pages at florash.github.io/rainyhour/

MyTab — Chrome Extension

2026

Personal Project

- Built a Chrome extension that replaces the new tab page with customised wallpapers, improving user experience and personalisation across browsing.
- Designed dynamic backgrounds and theme integration, developed using Chrome Extension APIs and JavaScript with automated asset generation.

EDUCATION

Master of Engineering Management

2019 – 2020

University of Technology Sydney

Risk Management · Advanced Project Management

Bachelor of Information Technology

2016 – 2019

Macquarie University
